Subject: Podusta Pool Permit

Dear Mr. Schubert,

We have reviewed the documents submitted to the website. They are clear with regards to the placement of the pool and the orientation to our property that sits underneath the south facing portion of the structure. Based on the submitted drawings the pool is also on the South facing side of the structure. We have major concerns around the proposed lighting and alarm systems, neither of which are described in any detail in the proposal and have the potential to cause significant light (e.g.-motion activated flood light or flood lights that are on at night) and noise pollution (motion activated alarm, motion activated alarm and the residents are not home) in this dark and quiet neighborhood.

The proposal should provide greater detail in this regard and we request the zoning board takes these factors into consideration in assessing and influencing the project.

We will try to join by Zoom.

Best regards,

Chris & Betsy Bowden
